

CS1073, Fall 2012

Pair Programming Log

Partner 1's Name (print): _____

Partner 2's Name (print): _____

Section (instructor's name): _____

Lab Number: _____

| Date | Minutes partner 1 spent driving | Minutes partner 1 spent navigating | |
|------------------------------|---------------------------------------|--|-------------|
| | | | |
| | | | |
| | | | |
| | | | Grand Total |
| Sub Total minutes | | | |

Enter the date and the amount of time in minutes spent by partner 1 in the appropriate box or boxes, and compute the total. Partner 2's numbers follow since all work is done as a pair. As a reminder, each partner should drive roughly 50% of the time.

Comment on your experience working on the exercise, including any problems and challenges encountered either with the exercise or with the pair programming experience.
